

AUGUST 2013

BACK TO

SCHOOL!

Customers,
It's back to school time and we need to refresh your knowledge on water conservation!

We have a few water conservation ideas listed to the right, but there are so many more ways to conserve.

Please visit our website www.mvud.org.

We are partners of and support EPA's WaterSense program!

Ways to conserve:

Turn off the faucet while you brush your teeth.

While your shower water is heating up capture the cold water in a bucket to water your plants.

Scrape food off your plate instead of rinsing.

Fix leaks.
