

NOTICE TO ALL BUILDERS, CONTRACTORS AND DEVELOPERS

PART A

THE FOLLOWING ITEMS MUST BE MET BEFORE A METER WILL BE SET:

1. The meter box must be marked and visible from the road.
2. The water hydrant must be in place (the pipe into the box must go underground).
3. The box must be covered around BUT NOT covered up.
4. During the winter months, the hydrant must be frost free to keep from freezing.
5. The yoke in the meter box must be set on stone, no more than 18" (maximum) depth and no less than 16" (minimum) depth. Yoke needs to be centered from side to side and 1 1/2" from the shut off valve.
6. When yards are to finished grade, Mallory Valley must be called for a final inspection of the meter box.
7. A hose bib must be installed at the meter or at the service line tied to the house.
8. An RP backflow device must be installed where an irrigation system exists.

NOTE- The above list does not include all technical specifications that must be met. Mallory Valley has technical specification books available for \$15.00 at our office. The cost includes notification of any updates made in the future. You may also come by our office at anytime to review our rules and regulations.

PART B

THE FOLLOWING ITEMS WILL RESULT IN AN AUTOMATIC DISCONNECTION:

NOTE: Automatic disconnection will be subject to additional penalties, including fines. These fines must be paid before water service will be turned back on.

1. If the meter box is uncovered or moved out of place.
2. Removal of the meter.
3. Tampering with the cut-off valve on the yoke.

DISTRICT PERSONNEL MUST BE ABLE TO INSPECT AND OBTAIN READINGS FROM THE METER AT ALL TIMES. THEREFORE, AS PER THE DISTRICT'S RULES AND REGULATIONS, A METER TAMPERING FEE WILL BE ASSESSED IF THE METER IS COVERED OR BLOCKED IN ANY WAY. THE FEE FOR THE FIRST OFFENSE IS \$250.00 AND SUBSEQUENT OFFENSES ARE ASSESSED A \$500.00 TAMPERING FEE.

WATER SERVICE AND BILLING WILL REMAIN THE RESPONSIBILITY OF THE BUILDER, CONTRACTOR OR DEVELOPER UNTIL A FINAL INSPECTION IS CALLED IN TO MALLORY VALLEY AND THE METER, METER BOX AND SURROUNDING AREA MEET ALL NECESSARY REQUIREMENTS AND PASS THE FINAL INSPECTION.

I have read and will abide by the items listed above and understand that I am responsible for the meter until the new homeowner takes possession of the property. I further understand that the meter may be disconnected and that I am responsible for any penalties mandated by Mallory Valley Utility District if the above conditions are not followed.
