

PLANNING AN IRRIGATION SYSTEM?

Installing an irrigation system could save you money on your sewer bill.

Before you install an irrigation system, you must contact Mallory Valley. There are fees that must be paid and guidelines that must be met before the irrigation meter can be installed.

If these guidelines are not met, you will not be eligible for sewer discounts with the City of Franklin.

Once your irrigation meter is installed, please be aware that there is a “minimum” monthly water bill on all meters, including irrigation meters.

For residential $\frac{3}{4}$ inch meters, the minimum bill is \$9.00 plus tax for water usage between 0 and 2,000 gallons per month. Minimum billing allows the District to cover a portion of its operating costs. This policy is standard practice for most utility districts.
